### Dance Practice with Adults

04 March Essen / 26 May Hamburg

This one day workshop will provide an introduction to the area of dance practice with adults. It will provide a context for the development of this new market, address business development and marketing opportunities and help participants develop a practical toolkit for working with a group of adults.

Within the workshop we will explore how your teaching practice can be adapted to deliver an integrated and stimulating class for a group of mixed ability adults. The workshop identifies how bodies differ physically and the limitations that age might introduce in an adult dance class.

### Dance for Older Learners

05 March Essen / 27 May Hamburg

This one day workshop aims to introduce essential considerations and core principles to bear in mind when developing a dance programme for the elderly. The day also provides an opportunity to put theory into practice in a session with a senior group.

The workshop presents recent research of appropriate and effective dance techniques and the benefits of dance for the elderly. It provides practical experience of different dance approaches and an introduction to appropriate progression. Health and safety considerations are also part of the workshop's content.
